QUESTIONS

1 WHO CAN ENTER: Open to all students

2 HOW TO ENTER Build your own business plan. A business plan is a written document that describes your business, its goals, and how you will achieve them. It is a roadmap for your business, and it is essential for success. The first step in building your business plan is to conduct market research. This involves gathering information about your target market, your competitors, and the overall market environment. Once you have gathered this information, you can begin to develop your business plan. The plan should include a clear statement of your business's purpose and goals, a description of your products or services, a marketing strategy, a financial plan, and a management team. Once you have completed your business plan, you can use it to attract investors, secure financing, and guide your business's growth.
